## Keeping a Safe Working Environment

Please help us follow the below guidelines to ensure we can work safely on your site.

1. Please ensure the equipment is positioned in a designated area enabling our engineers to enforce social distancing procedures as shown in the images below.
2. Our engineers will mark out A SAFE WORKING ZONE around the equipment giving them space to carry out the work safely. All equipment will be provided by ourselves.
3. All visiting engineers will wear gloves and will sanitise the equipment before AND after any work has been carried out.
4. We will not ask you to sign any paperwork but will ask for the correct name so that WE CAN complete the authorisation details on any paperwork.
